Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1, 5-10 and 14-24 are rejected under 35 U.S.C. 102(b) as being anticipated by McKinven, U.S. No. 3,363,911 ("McKinven").

A seal assembly (Fig. 7) comprising a rotating portion comprising a running sleeve segment (99) located generally parallel to an axis (Fig. 7).

A fixed portion comprising a seal mounting segment (96) generally transverse to the axis. There is a seal mounted to the seal mounting segment (97), the segment is in contact with the running sleeve (99).

There is a slinger end (98) on one of the rotating portion and the fixed portion, the slinger end (98) extending radially outward beyond the seal (97).

There is a slinger extension (91) on the other of the rotating portion and the fixed portion (92). The slinger extension (92) also extends radially beyond the seal (97). The slinger extension and slinger end are spaced axially in a direction of airflow (Fig. 7).

One of the slinger extension and slinger end extend radially outwardly beyond the other of the slinger extension and slinger end (i.e. 91 extends further radially outward than does 98).

The rotating portion further comprises an upper seal segment (100) in contact with the seal.

The upper seal segment is U-shaped in cross-section. The upper seal segment is generally parallel to the running sleeve segment (Fig. 7).

The seal assembly may be located in a driveline component (Col. 1, line 25-27)

Response to Arguments

II. Applicant's arguments filed 11 February 2005 have been fully considered but they are not persuasive. Applicant basically states what he believes the McKinven reference not to show without any supporting argument as to why these features are absent. To the extent that Examiner understands Applicant's argument; Examiner disagrees. In figure 7 extensions 91 and 98 clearly extend radially beyond the seal located generally at 97. Further, the seal is in direct contact with the running sleeve segment 99.

III. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3676

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

IV. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Enoch E Peavey whose telephone number is 305 1977. The examiner can normally be reached on Mon-Fri 8:00 am to 4:30 am.
